Chapter 1: MRI Basics

- No radiation - uses magnetic field + RF. Excellent soft tissue contrast.
- Contraindications: pacemaker, cochlear implant, ferromagnetic foreign body.
- Claustrophobia: explain, use mirror, short sequences.

Chapter 2: Sequences

- T1: anatomy, dark fluid. T2: pathology, bright fluid.
- FLAIR: suppress CSF to see periventricular lesions.
- STIR: fat suppression, sensitive for edema.
- DWI/ADC: diffusion, stroke detection.

Chapter 3: Positioning & Safety

- Coils: use body coil, head coil, knee coil per area.
- Ear plugs + communication ball.
- Screen for metal: questionnaire mandatory.
